Day of Infamy

The United States entered WWII after the attack on Pearl Harbor, Dec. 7, 1941.

Trivia Whiz

Preserving the Everglades

At the southern tip of Florida sits a complex system of wetlands, teeming with subtropical wildlife. Everglades National Park was established 70 years ago on Dec. 6, 1947.

At 1.5 million acres, it is one of the largest national parks in the U.S.

It was the first park founded to preserve plants and animals rather than geological features.

The American crocodile and alligator, Florida panther and West Indian manatee are among the park's more than 20 threatened or endangered animal species.

With its mix of fresh and salt water, nine different habitats are found in the Everglades' intricate ecosystem, ranging from marshes to forests.
